

BREAKING NEWS

Extreme weather is coming! Build a structure to prevent disaster.

BUT you don't know what disaster will befall your house. Prepare for anything!

Here is what might be forecasted for today:

FLOODING—Water will be poured on your base plate.

Make sure your house is elevated or secured in some way to prevent it from being washed away.

DOWNPOUR—Water will be poured onto your house from above.

Maybe build a roof or some other structure to divert the water away.

HIGH WINDS—The fan will try to blow your house down.

Build a wall to block the wind or find a way to secure your house to the ground.

HORIZONTAL RAIN—Water will come from the sides.

Build a wall to block your house from getting soaked.

TORNADO—The fan will blow from above your house.

Build a roof to block the wind or find a way to secure your house to the ground.

EVERYTHING—All five weather events will happen.

Prepare for the worst.
